

Integrated Project Management

The Kinaxis® RapidResponse® Integrated Project Management application enables direct links between project tasks and supply chain availability so you can make sure your project delivers outstanding results on time.

With the Integrated Project Management application, you'll easily be able to handle the challenge of managing complex supply chains and projects by easily coordinating the timely, accurate and efficient delivery of materials, supplies, equipment and labor. By embedding critical project management resources in the same system where you manage your supply chain, you can align decisions and synchronize actions.

Business outcomes

- ▶ Fewer missed project milestones, resulting in less financial penalties
- ▶ Decreased time to revenue recognition
- ▶ Improved cash utilization
- ▶ Alignment between all stakeholders: project office, supply chain operations, finance and your customers

“RapidResponse has improved management’s ability to make decisions based on choices and consequences, and the speed at which they do so.

Vice President
Fortune 500 Hardware Company

Application process components

The out-of-the box Integrated Project Management application supports these process steps:

1 Import project(s) and associated activities

- All project activities imported into RapidResponse including activities directly linked to demand and supply plans

2 Evaluate current project status

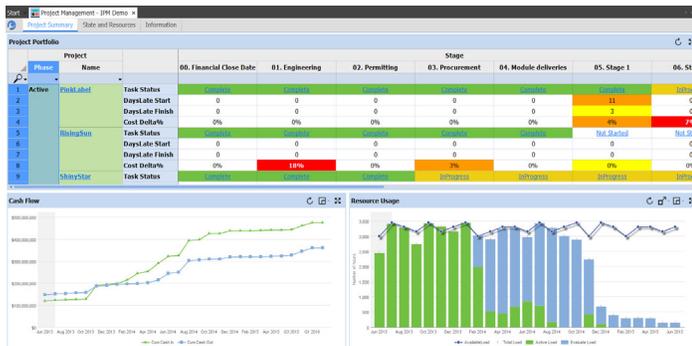

- Analyze cash flow, resource usage and project completion deliverable

3 Assess change implications

- Conduct what if scenarios of project or supply changes to assess implications of project status

4 Update project schedules

- Perform final review and update new project schedules and activities

Integrated Project Management dashboard

Integrated project plan

Managing performance

Standard measures include revenue, margin, inventory value, on-time delivery and constraint utilization as well as metrics associated specifically with demand planning. This allows for focused analysis of the performance measures most applicable to the function at hand. Measures presented in the Integrated Project Management dashboard include:

- ▶ **Project Completion:** Provides visibility to project completion at the task level and identifies gating activities.
- ▶ **Project Cash Flow:** Summarizes the costs and revenue over the course of the project.
- ▶ **Project Cost Analysis:** Compare the costs between two project plans. Review the costs at the project level, task level and material costs tied to the tasks.
- ▶ **Project Resource Usage:** Evaluate and override resource usage across projects.

Cross-functional collaboration

In the Integrated Project Management application, collaboration occurs across these functional roles:

Kinaxis RapidResponse allows companies to concurrently plan, monitor and respond on one platform, across business functions.

With a single data model and analytics engine, RapidResponse offers an array of supply chain applications all easily accessible through a common user interface. Using our single product, instead of individual disparate software solutions, our customers gain end-to-end supply visibility and the agility to respond quickly to changing conditions. The result is significant operating and cost efficiencies.

Deploy RapidResponse applications individually or together. Designed to be highly configurable, you can easily adapt our applications to meet your company's unique business needs without the heavy burden of ongoing custom coding.

What's next on your supply chain journey?

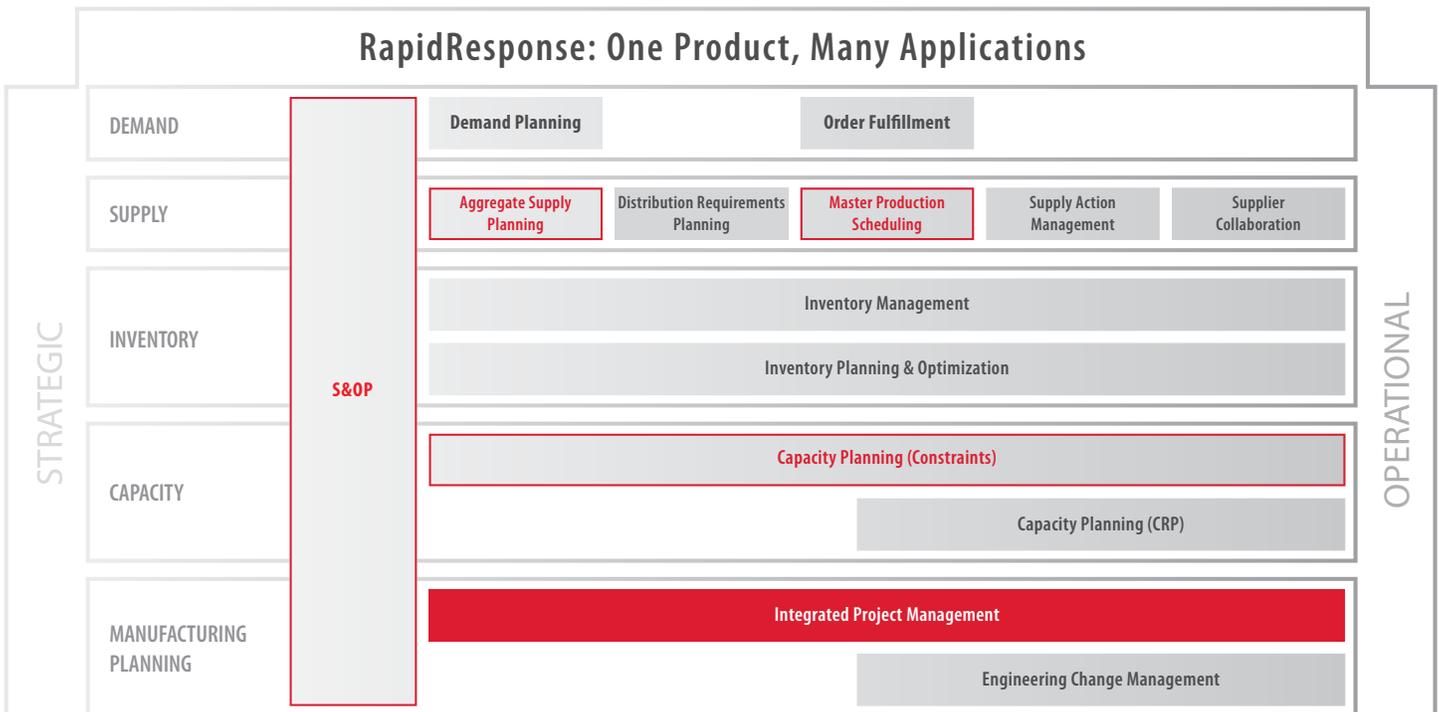

Choose the path that's right for your organization. With all our applications running on the single RapidResponse platform, you have the flexibility to deploy at your own pace. We'll help you mature your planning processes, wherever you happen to be in your supply chain journey. Achieve added benefits by using the Integrated Project Management application alongside one or more related applications to ensure synchronization across interrelated planning processes.

Organizations that use the Integrated Project Management application will have also subscribed to the S&OP application, and can achieve even more value by using it with the Aggregate Supply Planning or Order Fulfillment applications.

“ RapidResponse has given us one integrated plan of record.
