

What are your supply chain pain points?

With products evolving almost continuously and the pressures of a low-margin, cost-focused business model, high-tech and consumer electronics companies can struggle to plan effectively for their supply chains.

KNOW SOONER, ACT FASTER WITH KINAXIS®

Using a single planning platform, Kinaxis unifies your supply chain planning to streamline your processes, break down silos and plan concurrently across every area of your supply chain – from S&OP to demand, inventory, supply, capacity and more.

Accelerate your time to M&A integration

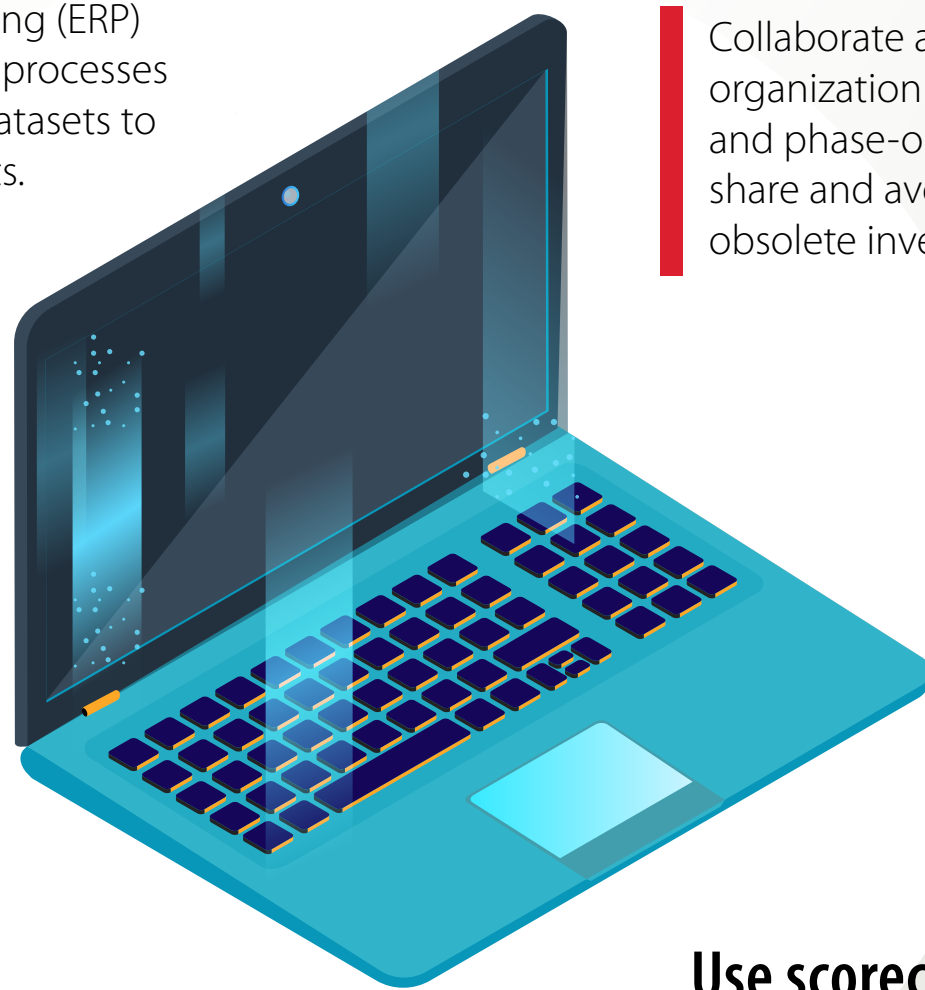

Bring together fragmented enterprise resource planning (ERP) systems and supply chain processes and streamline multiple datasets to reduce inventory and costs.

Manage product lifecycle with consensus demand planning

Collaborate across the organization to time phase-ins and phase-outs to grab market share and avoid excess and obsolete inventories.

See your supply chain from end to end

Full visibility gives you insight into planned and current demand, inventory, capacity, constraints and supply at every level of your product hierarchy.

Keep up with evolving feature sets

Create multiple versions of simulations for distinct lifecycle curves—new, steady state, price drop and slow moving—and manage margins as you go.

Use scorecards to track performance

You can track multiple versions of your plan against key performance indicators and see how decisions will affect revenue, profitability, service, margin and costs.

Make collaborative decisions
100X faster with Kinaxis.

Talk to us today and find out how to make your supply chain planning faster, smarter and more efficient.
