

What are your supply chain pain points?

Product expirations, patent cliffs and the need to comply with multiple regional regulations can make it a challenge for life sciences companies to plan effectively for their supply chains.

KNOW SOONER, ACT FASTER WITH KINAXIS®

Using a single planning platform, Kinaxis unifies your supply chain planning to streamline your processes, break down silos and plan concurrently across every area of your supply chain – from S&OP to demand, inventory, supply, capacity and more.

Go beyond your ERPs to see all the variables

You can use scenarios to bring tenders, trade promotions and new products into your supply chain plans for the most complete picture possible.

Plan demand and supply in real time

Balancing demand and supply at multiple levels of aggregation and planning in real time let you accurately manage volumes at all levels of your product hierarchy.

Deal effectively with product expirations

By monitoring expirations at multiple levels according to country and other shelf-life criteria, you can take action before inventory is no longer usable.

Take advantage of attribute-based planning

With attribute-based planning, you can create multiple supply chain policies for different global and regional requirements and manage multiple regulatory constraints.

Be better prepared for patent cliffs

Use key performance indicators (KPIs) in real time and compare multiple scenarios for tradeoff analyses so you can project the impact of patent transitions.

Digital transformation can happen faster than you think.

We can get you there sooner with the fastest, successful end-to-end advanced planning go-lives on the market. [Talk to us today to find out how.](#)
